

Maintenance Guide

To keep your new PVCu Windows & Doors looking great and working efficiently, regular cleaning is necessary.

The working parts of your products are covered for up to 2 years on the manufacturer guarantee, but only when they are maintained properly.

We have put together a Maintenance pack which has been carefully selected to assist in the maintenance process, and are the leading products on the market.

Each Maintenance Pack contains: 1 x PVCu Aerosol Spray Cleaner / 1 x Glass & Mirror Aerosol Spray Cleaner / 1 x Silicone Spray / 1 x White Grease / 1 x Tissue Roll

The cost of each pack is: £40

For individual prices, please contact the office.

Please follow the easy instructions overleaf & if you would like to purchase a Maintenance Pack or individual items from the pack, please contact the office/ showroom for Oz Windows Ltd:

Tel: 01392 757476

Email: ozwindowsltd@gmail.com

General Cleaning

PVCu Frames

Good old soap & warm water is always the best for cleaning off general dust & dirt from your PVCu frames, using a soft cloth or sponge. For more stubborn marks, use a PVCu Spray Cleaner, which can be purchased through Oz Windows Ltd, with colour free tissue.

Tracks, Hinges & Locks

Keeping the channels of your Doors & Windows clear of debris will allow them to move smoothly and reduce the risk of damage. Use a damp cloth to remove any partials or Hoover them out on a regular basis.

Lubrication of the mechanical moving parts will keep them from becoming stiff. Dust and Moisture can cause stiffness, meaning the continued force when opening/closing them could cause damage to the metal components.

This will lead to gaps, allowing air in. To lubricate the moving parts, apply Vaseline to the hinges & locks, but for hard to reach areas Oz Windows Ltd can provide a white grease spray.

Cleaners, such as WD40 are not recommended as these clean metals of lubricant causing them to become stiff.

Glass Cleaning

No one likes seeing smears when looking through their windows, so regular cleaning is necessary to prevent the buildup of dust & dirt. Again, trusty soap & warm water will keep them clean, but for more stubborn marks – Oz Windows Ltd can provide Glass & Mirror Spray along with a colour free cleaning tissue.

We hope this guide will help, but please feel free to call us for any advice on: 01392 757476
